

# Optimal Decisions Group

## Software Developer - C# .NET

**Optimal Decisions Group** is a dynamic, rapidly-growing firm that provides consulting services and software to top class international clients. We are searching for a passionate, experienced developer to provide dedicated, hands-on attention to all aspects of our software, through all phases of the development cycle. We have offices in Australia and the United States.

In response to strong demand, we are in search of an outstanding Software Developer.

The position :

- Work on all aspects of our software—from predictive modeling, simulation, and optimization, to optimizing performance-critical operations applied to enormous datasets, to planning out how a user interacts with the interface.
- Refactor and rewrite legacy code, reassess architectural decisions, investigate new tools and techniques, and look for ways to do things better and with less effort
- Assist others with less technical experience and raise the level of software engineering within the firm.

Requirements:

- 2-5 years professional experience in software development
- An understanding of software fundamentals that renders them second-nature
- Ability to recognize bad design decisions and convince others how they should be fixed
- A zeal for software development that combines the passion of an artist with the rigor of a scientist
- Pragmatic, avoid 'reinventing the wheel' but also learn new skills quickly
- Self-motivation to work effectively with colleagues in a small, but fast-developing division
- Our software is written in C# 2.0 as a standalone Windows Forms application, so experience with a similar language or environment is appreciated.

Our offer:

- A true meritocracy; be judged on quality, not time spent or location
- Organizational agility unmatched by larger firms
- Work with peers that understand software engineering and are willing to experiment and innovate
- A competitive salary

If you meet these requirements and you want to be part of an innovative, fast-growing group with an international reach, apply now demonstrating that you have the skills and experience to exceed our expectations.
